LED Programmable Vehicle Identification Displays

MADE IN THE USA

Bright & Rugged LED Displays ▪ *Most Dependable in the Industry* ▪ *Maintenance Free* ▪ *Field Tested for Over 17 Years!*

NVIZN™ LED Programmable Displays are the most efficient form of LED displays Driver Industrial Safety™ has to offer. Recognized globally for dependability, high visibility, and programmable functionality. LED Programmable displays provide the most robust and efficient solution to identify any vehicle or heavy equipment especially under extreme, low visibility weather conditions. NVIZN™ products have proven to be the most visible enabling continuous Day and Night operation on countless mine sites with the luxury of no maintenance. We offer up to (5) characters within our Single-Framed displays for users to efficiently program multiple numbers, letters, or characters and/or messages for required equipment identification. Determine your Mounting and Distance Criteria™ (DC) requirements to ensure you select the right Type, Size or a Combination of displays to safeguard workers and site management so they are easily able to identify unit number, unit status, speed limit, payload weight, or otherwise, from afar. Count on Driver Industrial Safety™ to protect your valued Personnel & Assets!

Driver Industrial Safety's Message Board Displays supercede expectations of Smart Communication! Armed with advanced communication capabilities, this NVIZN™ product instinctively enables the built-in Smart Communication providing a seamless connection from the display to your intelligent software, device, or vehicle as needed. Many sites have the need to convey displaying the payload to the shovel operator as the truck is being loaded, vehicle speed limit, low battery alert, truck wash bay traffic signals and direction, and much more. These communication ideas our LED Message Boards relay are utilized on many industrial and commercial sites. Messages are pre-programmed to display ones Equipment Status, Arrows for Traffic Guidance along with various other communication requirement needs.

► Custom Programming
► Sealed System Display for Protection
► Real-Time Programming Capability

► External Waterproof Pigtail
► Message Vehicle Number Lock

► Easy Touch-Screen Controls
► LED Viewing Screen

NEW! PAYLOAD DISPLAY
Assists both Digger & Loader Operators! Displays are mounted to the Haul Truck, in view of operator, displaying "Real Time" Payload weights as materials are being loaded onto a Dump Truck.

BL2SIG6-24V-R/B *(without remote)*

These displays are operational as a Signaling device to indicate a mode of operation of a vehicle, a direction of a vehicle, type of use of equipment, signal needs to others, a directional help on a site, or a vehicle is in use at that time. Driver Industrial Safety's NVIZN™ Signal Light displays use coloration such as "Red Light, Green Light" signaling to indicate use or directional flow of equipment, personnel or vehicle surrounding it when in use or indicate the function of vehicle needed for signaling others on site. Signal Lights provide color signaling uses which denotes what use it is being used at, such example as forward and reverse; or an autonomous mode or manual driver indicator, or to denote traffic direction such as stop or go, pass or do not pass by to bystanders alongside the vehicle(s) or intersections; etc.

► **Available in 110V & 220V upon request (refer to factory for wire hireness)**
